

CBEA Refrigeration Project Team

Discussion Materials for
Energy Efficiency Forum

May 23-24, 2012

- Review of agenda and meeting goals. (5-10 mins)
- What are the most critical energy issues affecting each member? (15-20 mins)
 - What's the single biggest need for achieving energy savings?
 - What's your biggest accomplishment from the past few years?
 - What is the most important barrier to achieving your goals?
- Summary and next steps for current projects (20-30 mins)
 - Focus on deployment steps and what is needed from members
 - Commissioning guide
 - Doors on cases guide
 - Compressor rack specifications

- Finish conversation from 1st breakout (15-30 mins)
- What should be done next year? (30-45 mins)
 - Potential topics
 - Case lighting- is this already a done deal?
 - Alternative refrigerants / secondary systems
 - Compressor Rack Challenge, like the RTU Challenge
 - Walk-ins?
 - Setting of industry-wide goals (like French chains' commitment to add doors to 75% of open cases by 2020)
- What is needed from manufacturers, engineers, others like utilities, efficiency organizations? (30-45 mins)
 - Tomorrow's attendees include leading manufacturers of cases, controls, compressors, doors, as well as engineers and commissioning staff
